Subj : PRI-G and PRI-D Products

David,

We just wanted to drop a line and tell you how pleased we are with your products, PRI-G and PRI-D. We have used it exclusively for about 18 months now and have seen marked improvement in performance in all our vehicles. We have three yard tractors and 2 service trucks using the diesel formula. We also use the gasoline formula in several more vehicles including all of the employee's vehicles. Everyone has seen improved smoothness and better gas mileage.

As a marine dealership we have also seen many problems with outboard motors due to the effects of E10 and water. Much of our service work is due to the harmful effects of E10. We are using PRI-G to prevent the problems that so many marine outboard owners are facing today with clogged filters, excessive water in fuel and poor performance due to loss of octane. We strongly advise all our customers to use your product on a regular basis. It is not at all unusual to have a customer report back to us how much better his boat performs

Regards,

Blackbarry Marine
