Mr. Ralph E. Lewis
Power Research, Inc.
3 Civic Plaza, #267
Newport Beach, CA 92660

Dear Mr. Lewis:

Generac Power Systems, Inc. has reviewed PRI-D diesel fuel treatment and PRI-G gasoline treatment, and support the benefits and improved performance claims your literature points out.

The fuel stabilization to extend storage life is impressive. It is apparent that carbon deposits can be significantly reduced to the point of being a non-factor.

Power Research, Inc. certainly can be a major factor in the engine and generator industries.

Sincerely,

Steven A. Hesse
Vice President - Service Operations
