Dear Ralph and Wanda,

I am retired, but remain an active boater. I work boat shows, attend dealer meetings, conduct demonstrations and spend a lot of time on the water. I am presently running 4 boats. I'm writing to let you know how satisfied I am with your PRI fuel treatments.

I have been using PRI in all the boats to stop carburetor jets from clogging and fuel from deteriorating. In the past, I had to use two different additives; one to keep the jets clean, the other to stabilize the fuel. Now I'm able to realize both benefits with one product, your PRI-G. This product has really made my maintenance easy. It not only works, but also is very easy to use. Your container allows exactly the right amount of additive with the simple tube and measuring cup on top.

I use PRI-G with my twin outboard rig, single engine Hewes Bonefisher, riding lawn mower, push lawn mower, my 4-hp spare outboard, Jet Ski, and all 4 of my autos. One son-in-law has a Chevy Diesel and uses the PRI-D to improve its engine performance.

I have recommended the product to dozens of friends and dealers. Every person has been completely satisfied and raves about the product. Your eight different benefits really work! Thanks for the great product!

Yours truly,

A handwritten signature in purple ink that reads "Bob Hewes". The signature is written in a cursive, flowing style.
