To Whom It May Concern:

I wish to provide testimony to the benefits of using PRI-D diesel fuel treatment. We have been using PRI-D as the exclusive diesel fuel treatment aboard our research vessel for the last 5 years. The R/V Western Flyer has five Caterpillar diesel electric marine gensets onboard. In that time we have not had a single problem with our fuel system. The following are some relevant points to the benefits of using PRI-D that we have noticed onboard:

- It keeps tanks and fuel lines free from slime and sludge.
- We have not had any injector problems
- Noticeably reduced smoke emissions

We believe that this is a great product and plan on continuing to use it.

Very truly yours,

Peter Zerr
