

FOR SMALL GAS ENGINES

PROFESSIONAL GRADE

PRI-G Small Engine Gas Stabilizer offers true professional grade protection against fuel degradation.

That's because **PRI-G** contains PRI's advanced thermal stability chemistry – the same used by commercial vessels and public utilities for maximum fuel protection.

This means your fuel will stay fresh during long lay-up periods. Fuel systems stay clean and ready to go for quick starts and maximum engine reliability.

Formulated specifically for small two and four stroke gasoline engines, **PRI-G** also prevents power-robbing carbon deposits. Your engine stays clean, running at maximum efficiency with optimum fuel economy.

PRI-G is your insurance against costly repairs and premature engine component failures.

Simply add one ounce of **PRI-G** for every 2.5 gallons of fuel or one-half ounce for every 4.7 liters of fuel at each and every fueling.

Best yet, unlike common “dispersant” type stabilizers, **PRI-G** has an indefinite shelf life when sealed and is fully guaranteed to stabilize any gasoline at any time. In fact, independent laboratory tests prove **PRI-G** is more effective than any gasoline stability additive available today.

PRI-G may be used at double strength to restore old, stale gasoline when mixed thoroughly with the fuel. **PRI-G** Small Engine Gas Stabilizer is available in 8 ounce, E-Z measure bottles, treating 20 gallons of gasoline. Shelf life of **PRI-G** is three years.

PRI: More From Your Fuel – More From Your Engine
