**RECLAIM STALE
UNUSABLE GASOLINE
FOR LESS THAN EIGHT CENTS PER GALLON**

Certified test results show PRI-G restored stability and usability to stale varnished 15-year-old gasoline. When added and properly mixed, PRI-G restored the fuel to safe, acceptable and useable levels.

Tennessee Valley Authority

"An annual sampling and testing of the fuel oil tanks at our Allen Turbine facility revealed that the fuel oil stability in one of the tanks had deteriorated to a 17 pad rate. 1.8 million gallons of fuel has been fully treated with PRI-D and we have re-sampled the tank and tested the fuel. The Dupont Pad rating with PRI-D treated fuel went from a 17 to a 3, fully meeting TVA specifications." – TVA

Power Research, Inc. manufacturers of PRI-G, a successful 22-year-old company, treats fuel for large power producers, ships and boat yards restoring millions of gallons of unusable fuel is now available in easy to measure 32 oz. bottles, 1 oz. treats, 16 gallons of stale or marginal fuel.
