To Whom It May Concern

As a manufacturer and direct distributor of Ford Marine Engines throughout the West Coast, Alaska and Canada, we at Redline Marine highly recommend the use of Power Research Inc. fuel treatment products to all of our customers.

PRI chemistry has established an impressive track record in reducing emissions products from both gasoline and diesel engines while providing improvements in performance and economy. Additionally, PRI treatments are unsurpassed in preserving fuel quality in storage, while preventing hard carbon deposits on critical engine components.

In summary, Power Research Inc., is on the cutting edge of preserving and enhancing fuel quality for the consumer.

Sincerely,

A handwritten signature in black ink that reads "Chris Stout".
